NEW! Portable Lily Pool

Description of Pool

This new, ready-made Lily pool is made of one of the new plastic materials and has been especially designed for the garden of restricted area. It is pretty as a picture itself. It's practically indestructible. Absolutely no trouble to make, because it's already made . . . and so inexpensive you can have several of them for various places for far less than it would cost you to make one of reinforced concrete.

And the best part of this Lily pool is that it is **portable**. In other words, you can have it in one place this year and some place else next year if you wish. You can place it so its sides are high above surrounding garden or lawn or you can arrange it so that the top is at ground level.

It is resistant to sunlight, chemicals, grease, abrasion. There is not even a framework to assemble. And if by any chance you have the space or inclination, you yourself can easily move it into the house or cellar for the Winter to store your goldfish, or to store over the Winter.

Suggestions for the Care of Your Lilies

Hardy Lilies may be planted any time from the 1st of April until the middle of August.

Tropical Lilies may be planted when the temperature averages seventy degrees or about May 25th.

Water Lilies come into flower early in the season and bloom until frost.

Concrete pools are best left full of water and covered with boards and straw. Hardy Water Lilies will winter in the pool if the water does not freeze deeply, but Tropical Lilies are best considered as annuals and purchased new each year. Hardy Lilies growing in boxes may be taken into a cool basement until Spring. Care to be taken not to allow them to dry out.

Running water is neither necessary nor desirable and may retard the development of Water Lilies by keeping the temperature too low.

New concrete pools should be filled with water and drained at least four (4) times before any fish or plants are introduced.

Planting instructions are attached to every Water Lily tuber shipped.

Tropical Night Blooming Lilies

WHITE

Price

DENTATA SUPERBA (JUNO). Pure white Lily, 10 to 12 inches across, with yellow stamen. Leaves are large, deep, glossy green. Flowers very freely throughout Summer. Stands well above water. Very noticeable at night. **Each \$2.00**

MISSOURI. The best night-blooming white. Flowers early. Flowers usually 12 in. in diameter. The leaves are coppery brown when small but develop into deep green as they age. **Each 3.00**

PINK

OMARANA. Flowers from 8 to 12 in. across. Beautiful rosy pink. Stamens deep orange red. One of best and free flowering of all night bloomers. **Each \$1.75**

BISSET. Petals extremely wide, beautiful pink. One of the best growers. **Each 1.75**

RED

DEVONSHIRE. Deep red, about 6 to 8 in. across. Opens 7 to 8 P.M. and closes 10 A.M. **Each \$2.00**
